

Adding a Printer by Hostname

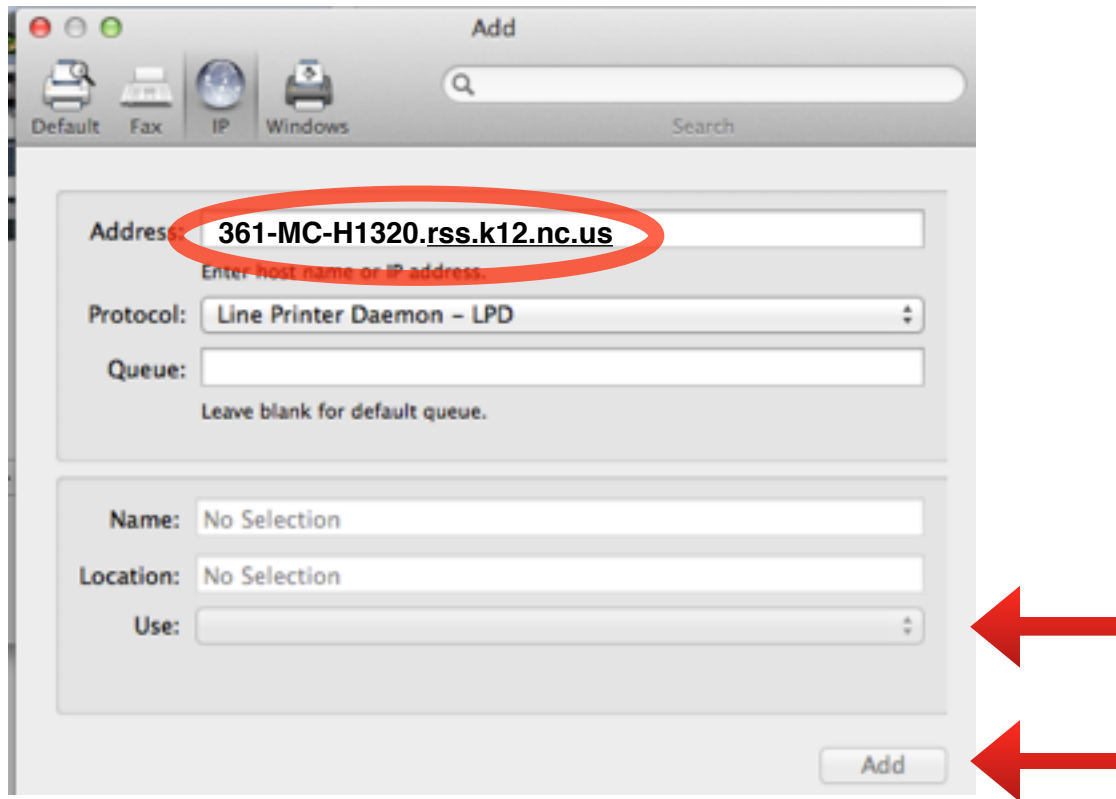

- Under the **Apple** at the top left corner, Click on **System Preferences**
- Once the window opens click on **Printer and Scanner Preferences**.
- Click on the **+** to add a printer.

- Once the **Add** window appears, click on the **IP** icon.

- Beside **Address** key in the Hostname of the printer (Example Below)

For the HP1022 Printer Only:

- You must click the pull down menu beside **Use** and **Click Select Software**.
 - Then choose one of the following drivers:
 - HP Laserjet 1022, 1.4.0
 - HP Laserjet Series PCL 4/5
- Then, click **Add**

For all other Printers:

- For all other printers, it should find the software, so click **ADD**.

Then for All Printers:

- If you see **Continue**, then click it.
- (Some software may need to be installed. Let it load and you should be able to print.)
- You should have successfully added a printer.
